DESIGN

QUALITY DESIGN TO
ENHANCE WELL-BEING

THESIS P. 109

THE LATEST TRENDS BY ROCA

Distinctive pieces and the latest technology are the features of the new 2008 magazine, in which Roca has opted for quality design by the leading professionals in the industry. This is the place to find all the latest design trends and stylish collections for the bathroom by Roca.

This year Roca launches a diverse collection of new bathroom designs to complement the already extensive product portfolio. The new products emphasise Roca's commitment to contemporary and innovative design, yet are functional and have the versatility to meet individual needs – the ultimate aim being to create a beautiful bathroom space with a relaxed and restful environment.

Here we show some exciting new designs for basins furniture brassware, shower trays and screens. Ergonomically designed, combining the latest technology with new shapes and colours, Roca's latest ranges are once again pushing the boundaries of bathroom design to meet the needs and desires of today's modern world.

Roca Limited

Samson Road
Hermitage Ind. Estate
Coalville, Leics. LE67 3FP
Tel. (01530) 830080
Fax. (01530) 830010
www.roca-uk.com

Each of Roca's single lever taps is equipped with a ceramic cartridge. These cartridges allow the reduction of water and energy consumption.

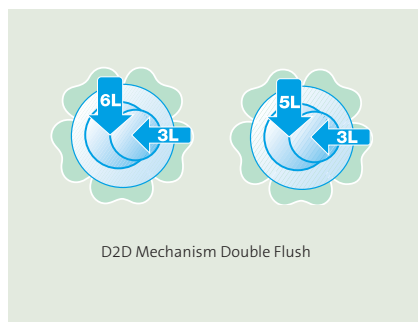

COMMITTED TO SAVING WATER

A cistern can hold 6 litres of water, but not every flush requires the full amount. With this in mind, Roca designed the innovative systems of Double Flush – D2D.

With the D2D's double push button system, pushing one of the circular buttons will use 3 litres. Pushing both buttons will use 6 litres. It's that simple and efficient.

Roca's single lever taps are also equipped with advanced conservation devices that facilitate a significant reduction of water and energy consumption.

With the exclusive Ecodisk cartridge, the volume of water used is reduced by up to 50%. With just one step the device is activated and you gain significant savings. The Ecodisk also comes equipped with a temperature regulator which translates into even more energy savings.

Bathrooms with style

*Top figures plan designs
with trend-setting
inspiration.*

The new Roca collection draws on the latest creative trends to offer a range of top-quality designer solutions. Leading international figures like Belén & Rafael Moneo, David Chipperfield, Ramón Benedito, Herzog & De Meuron, Schmidt & Lackner and Werner Scholpp have lent their names to Roca, with some highly attractive, distinctive pieces which take ordinary features of our everyday lives and elevate them to the level of sculpture. Their talent and different concepts take shape in creations designed for maximum personal well-being.

BELÉN & RAFAEL MONEO
Barcelona

Organic value, formal purity, essential character, minimalism, absolute freedom. All these form part of the collections to equip and embellish your bathroom, born out of profound reflection by top professionals in the fields of design and architecture.

Overall, each creation is conceived as an integral part of a setting – in this case a private one – marked by intimacy and complicity with the user.

DAVID CHIPPERFIELD
London - Berlin

For David Chipperfield, "The interesting part of designing something is not the object itself, but the space in which it enhances the rituals of everyday life".

Ramón Benedito, in an essential way, and Belén & Rafael Moneo, reclaiming the inherent value of objects, take a look backwards to compose a modular system which is different in every situation.

RAMÓN BENEDITO
Barcelona

Innovation, together with the emotional values of the setting, form the premises for Werner Scholpp and the Schmidt & Lackner studio.

Herzog & De Meuron, for their part, go for architectural solutions with designs clearly oriented towards their setting.

HERZOG & DE MEURON
Basel

SCHMIDT & LACKNER
Heidelberg

BULLO DESIGN
Venecia

Frontalis

Connect with nature

DESIGN: BELÉN & RAFAEL MONEO

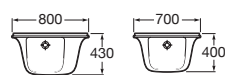

Frontalis is born out of a desire to fill the intimacy provided by the bathroom with peace. A full range of bathroom fittings and taps, with a design characterised by series of curves which capture the movement of water and its rhythmic flow. The different items making up the suite blend into the wall which supports them, creating a modular system able to adapt to achieve a different result in every situation. Frontalis represents a revolution in shapes in the bathroom, a return to the basic senses; this is palpable in every piece and visible in the sinuous, organic shapes of each part of the Frontalis collection.

Element

Radical

DESIGN:
DAVID CHIPPERFIELD

Compact, clean and simple pieces with a prism shape as their defining feature. This is the Element suite by Roca, true to the creative spirit of its author, the architect David Chipperfield. This collection, with a clear geometrical stamp, goes for a contained look, using decidedly chunky pieces to convey a distinctive, radical style with authority and a striking presence. An example of how to express the maximum with a minimum of pieces.

Stratum unit and washbasin, Vythos bath, Targa tap fitting.

Spaces for well-being

Welcome to our fantastic collection of little everyday luxuries designed especially for you to form part of a fresh, comfortable lifestyle.

Stratum unit and washbasin, Targa tap fitting

Stratum

Units made from 19 mm MDF with oak or walnut finish, protected with acrylic varnish and ready to take countertop washbasins.

These units stand out for their practicality, featuring drawers with trays inside, draw runners with a soft closing mechanism and a fluorescent light inside to give them a touch of distinction.

Long Island

Wall-hung units made from marine board laminated with flat-cut oak.

In good company

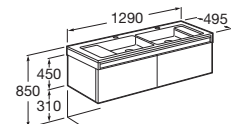

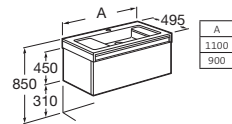

Roca invites you to discover an exclusive new concept developed to equip your bathroom on the basis of unique combinations of the washbasin and unit. These integrated solutions, which display striking simplicity and natural flair, are the result of a fusion of designs and needs in the bathroom and have been achieved by matching complimentary pieces together.

Brack unit, Bol washbasin, Touch tap fitting

Brack

Compact furniture with timeless lines, consisting of a series of versatile items which can be used both in the bathroom and to decorate other domestic settings.

Finished in grey ash, ivory or yellow ochre, they provide excellent grey options in terms of decoration, design and modernity.

Brack is an innovative concept for users who appreciate things that stand out from the crowd.

The series is made up of three base units for vanity and countertop washbasins, high matching modules, low drawer modules and mirrors with fitted light.

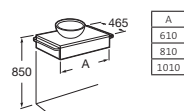

For Bol and Diverta washbasins (see p. 37 and 39).

Mirrors

Tau unit, Bol washbasin, Atai tap fitting

Giralda Corner unit, Giralda washbasin, Amura-N tap fitting

Tau

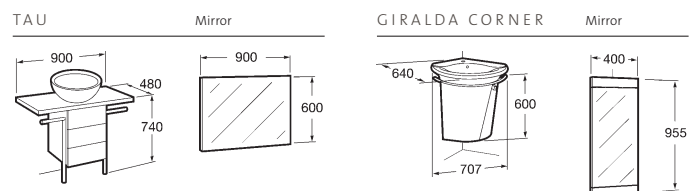

Total practicality. Absolute elegance. This is Tau, the bathroom furniture made of MDF laminated with natural cherrywood, compatible with the Bol, Fontana (see p. 37), Hall (see p. 18-20) and Happening (see p. 14) washbasins.

And a designer feature: a pair of matching stainless steel towel rails attached to the sides in a distinctive way.

Giralda Corner

Giralda Corner bathroom furniture is designed to decorate while taking advantage of a corner of the bathroom. Made of MDF with two finishes: laminated with natural maple wood or with a metallic coating.

Its tapered shape and curved doors give it a highly up-to-the-moment look. It can be used with Giralda countertop washbasins (see p. 32) and there is also a corner mirror cupboard available. An optional extra is a chrome towel rail to attach to the washbasin.

New Classical unit and washbasin

New Classical

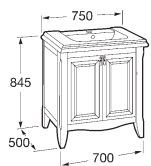

Stylish furniture made from solid wood in cherry finish with bevelled glass doors at the front.

The collection includes a vanity unit for New Classical countertop washbasins, a low unit with an Arabescato Venato marble top, a rectangular mirror with a frame in old gold finish and marble tops in Arabescato Venato finish.

Hydrotherapy

The power of water

The immense pleasure of treating yourself to a massage whenever you feel like it is wonderful. It is something you cannot put a price on. That is why we have invited 2 of the natural elements to join you: air and water. They are here to stimulate your senses in Roca hydromassage baths. That sought-after healthy balance between body and soul is within your reach. Look after yourself – you deserve it.

There is an ancient Chinese proverb which says that we must enjoy all the good moments which come our way, grasp them and make the most of them without hesitating too much, as we will certainly have paid for them beforehand. So... carpe diem – seize the day! A whole oasis of sensations awaits you. The atmosphere is loaded with good vibrations. Hydromassage is ideal for relieving all kinds of muscle and joint pains, as well as reducing tiredness, lifting your mood and improving your circulation. Give it a try. Targeted, localised water sprayed at your body is one of the best ways there is of relaxing and shedding often unnecessary tensions.

The jets of water provide a pressure which gives a marvellous feeling of lightness. The body seems to float, weightless, and this effect lingers on even after getting out of the bath. Take your time. Choose between 2 hydromassage systems: water mixed with air in jets which can be adjusted within the bath for an invigorating, high-energy massage, or else add to this with jets of air through the vents in the bottom of the bath for a gentler, more relaxing effect. Both these systems allow you to set the intensity and frequency of the jets. Optional extra: fit your bath with a practical, environment-friendly self-cleaning mechanism for the circuits and underwater illumination in acrylic models. Enhance your quality of life with Roca.

TONE-UP: ELIMINATES STRESS, FIGHTS INSOMNIA AND REDUCES CELLULITE.

Wellness

MÁGIC DROPS

Certain natural products added to the water can play a part as important as the **effect of the bubbles**. In fact, some medicinal and cosmetic substances have great invigorating, relaxing or slimming effects. However, you should always make sure that these products are soluble in water.

FIND YOUR IDEAL TEMPERATURE

The temperature of the water should be comfortable. Though some people like the water at 33 °C and some at 38 °C, the optimal temperature is 37 °C. In general, the higher the temperature is, the shorter the bath time should be.

A BIT LONGER...

Generally speaking, the recommended duration of the bath is **15-25 minutes**. In most cases it should be no longer than 30 minutes.

Spanish quality certificate given by AENOR (Asociación Española de Normalización y Certificación). Assures that products meet the qualifications of all Spanish (UNE) and European (EN) norms which apply to them.

You're in control here

◀ REMOTE CONTROL*

Air-Water System. Supplied as standard with the Aruba bath. As an optional extra for baths fitted with Air-Water whirlpool system: Veranda, Georgia, Novara, Thalassa, New Classical.

◀ FIXED CONTROL*

Air-Water System. Supplied as standard with the following baths: Veranda, Georgia, Novara, Waitara, Thalassa, New Classical, Vythos, Goleta, Catamaran, Senso.

◀ FIXED CONTROL

Water System. Supplied as standard with the following baths: Veranda, Georgia, Novara, Thalassa, New Classical.

Functions: Continuous Water Massage, Pulsating Water Massage, Electronically adjustable intensity of "Continuous Water Massage", Electronically adjustable speed of "Pulsating Water Massage" cycle, Automatic initial self-check, Water Temperature Indicator Lamp, Acoustic Alarm and Automatic Stop if the water temperature exceeds 50 °C, Whirlpool function, Timer Real Time Clock, Underwater Light and Biological Self-cleaning System (optional).

▲ PUSHBUTTON

Water-System.

(1) Supplied as standard with the following baths: Waitara, Vythos, Goleta, Catamaran, Senso, Genova.

(2) Optional: Pushbutton with Biological self-cleaning facility, except for Genova.

Functions: Continuous Water Massage.

* **Functions:** Continuous Water Massage, Pulsating Water Massage, Continuous Air Massage, Pulsating Air Massage, Electronically adjustable intensity of "Continuous Water Massage", Electronically adjustable speed of "Pulsating Water Massage" cycle, Electronically adjustable intensity of "Continuous Air Massage", Electronically adjustable Air Flow in the "Pulsating Air Massage", Automatic initial self-check, Water temperature indicator lamp, Acoustic alarm and automatic stop if the water temperature exceeds 50 °C, Whirlpool function timer, Real-time clock, Water heater system (in Aruba baths only), Auxiliary connection (for remote control only), Underwater light and Biological Self-cleaning System (optional).

Art in Cast-iron

Enjoy these elegant cast iron baths with their fine surfaces and unforgettable feel. Roca has been making pieces in this highly durable material since 1921. Their solid, robust structure withstands the passage of time with style. Reliability, cosiness and luxury are the attributes they confer on a bathroom. Roca cast iron baths have two layers of stain resistant enamel and are undersealed for added protection.

Free your **fantasy**

Choose what you really want, just to feel the pleasure of choosing. When an Eliptico bath becomes yours you enter a new dimension thanks to its divine combination of traditional cast iron and the warm woods of the Woodline version. Bathe in nature, imagine there is nobody else there – just you and your bath.

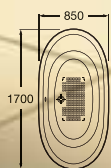

The Eliptico Classic makes a grand entrance: it sits in your bathroom on its exquisite feet, a tribute to the beechwood and cast iron-based design. Doesn't it stir your curiosity?

If you prefer a more modern touch, go for the Eliptico Futura, resting on an elegant base of luxurious deep-red wood. Its most exclusive feature is its practical towel rail at the side.
